Cell Differentiation, 20 (1987) 279, 280
Elsevier Scientific Publishers Ireland, Ltd.

Contents Volume 20

No. 1

Alberto Monroy 1913–1986 1

K. Yamana and H. Kageura (Fukuoka, Japan)
Reexamination of the 'regulative development' of amphibian embryos (*Review*) 3

M. Shioda and T. Shiroya (Tokyo, Japan)
Analysis of replicating DNA molecules from embryos of the sea urchin, *Hemicentrotus pulcherrimus*, by electron microscopy 11

V. Mouly, M. Toutant and M.Y. Fiszman (Paris, France)
Chick and quail limb bud myoblasts, isolated at different times during muscle development, express stage-specific phenotypes when differentiated in culture 17

H. Holthöfer (Helsinki, Finland)
Vascularization of the embryonic kidney. Detection of endothelial cells with *Ulex europaeus* I lectin 27

D.J. Webb and M. Charbonneau (Rennes, France)
Weak bases inhibit cleavage and embryogenesis in amphibians and echinoderms 33

F. Maruo and M. Okada (Ibaraki, Japan)
Monoclonal antibodies against *Drosophila* ovaries: their reaction with ovarian and embryonic antigens 45

L. Fucci, E. Vitale, C. Cirotto and G. Geraci (Naples and Perugia, Italy)
Evidences that hemoglobin switch in the chick embryo depends on erythroid cell line substitution 55

Y. Hamada, O. Yamashita and Y. Suzuki (Okazaki and Nagoya, Japan)
Haemolymph control of sericin gene expression studied by organ transplantation 65

Nos. 2 + 3

D. Bulmer, S. Peel and I. Stewart (Southampton, U.K.)
The metrial gland (*Review*) 77

L.H.K. Defize, C.L. Mummery, W.H. Moolenaar and S.W. de Laat (Utrecht, The Netherlands)
Antireceptor antibodies in the study of EGF–receptor interaction (*Review*) 87

C. Weber, H. Alder and V. Schmid (Basel, Switzerland)
In vitro transdifferentiation of striated muscle to smooth musle cells of a medusa 103

Y. Iwakura (Kyoto, Japan)
Effects of tunicamycin on the differentiation of F9 cells induced by either retinoic acid or retinoic acid and dibutyryl cyclic AMP 117

M. Betzalel and B. Moav (Tel Aviv, Israel)
Degradation of sperm histones in vitro by cytoplasm of the sea urchin egg 125

P. Andreuccetti, M.R. Barone Lumaga, G. Cafiero, S. Filosa and E. Parisi (Naples, Italy)
Cell junctions during the early development of the sea urchin embryo (*Paracentrotus lividus*) 137

L. Gualandris and A.-M. Duprat (Toulouse, France)
Structural alteration of the target plasma membrane affects reception but not expression of the neural inductive signal 147

C.L. Mummery, M.A. van Rooijen, S.E. van den Brink and S.W. de Laat (Utrecht, The Netherlands)
Cell cycle analysis during retinoic acid induced differentiation of a human embryonal carcinoma-derived cell line 153

Y. Wakamatsu, M. Obika and K. Ozato (Kyoto and Yokohama, Japan)
Induction of xanthophores from non-pigmented dermal cells of xanthic goldfish in vitro 161

M. Kédinger, P. Simon-Assmann, E. Alexandre and K. Haffen (Strasbourg, France)
Importance of a fibroblastic support for in vitro differentiation of intestinal endodermal cells and for their response to glucocorticoids 171

R. Adler (Baltimore, MD, U.S.A.)
Nature and nurture in the differentiation of retinal photoreceptors and neurons 183

P.J. Linser and M.S. Perkins (St. Augustine, FL, U.S.A.)
Regulatory aspects of the in vitro development of retinal Müller glial cells 189

B. Pessac (Villejuif, France)
Differentiation of retrovirus-infected avian neuroretina cells 197

H. Kondoh, Y. Ueda, S. Hayashi, K. Okazaki, K. Yasuda and T.S. Okada (Kyoto and Okazaki, Japan)
An attempt to assay the state of determination by using transfected genes as probes in transdifferentiation of neural retina into lens 203

G.J. Chader (Bethesda, MD, U.S.A.)
Multipotential differentiation of human Y-79 retinoblastoma cells in attachment culture 209

No. 4

T.C. Chambers, J. Song-Nichols, D.S. Campbell, E. Spitz, B.H. Leightling and H.V. Rickenberg (Denver and Colorado, U.S.A.)
Identification of nuclear substrates of the cyclic AMP-dependent protein kinase in *Dictyostelium discoideum* 217

D.H. O'Day and J. Rivera (Mississauga, Canada)
Lectin binding and inhibition studies reveal the importance of D-glucose, D-mannose and *N*-acetylglucosamine during early sexual development of *Dictyostelium discoideum* 231

C.A. Lessman (Antigonish, Canada)
Germinal vesicle migration and dissolution in *Rana pipiens* oocytes: effect of steroids and microtubule poisons 239

K. Shiokawa, K. Tashiro, K. Yamana and M. Sameshima (Fukuoka and Kagoshima, Japan)
Electron microscopic studies of giant nucleus-like structure formed by Λ DNA introduced into the cytoplasm of *Xenopus laevis* fertilized eggs and embryos 253

T. Maeda, M.K. Owada, H. Sugiyama, S. Miyake, Y. Tani, H. Ogawa, Y. Oka, T. Komori, T. Soma, S. Kishimoto, J. Seki, N. Sakato and A. Hakura (Osaka, Japan)
Differentiation of an Abelson virus-transformed immature B precursor cell line under the expression of tyrosine kinase activity of v-abl oncogene product 263

T. Akiyama, J. Matsumoto and T.T. Tchen (Yokohama, Jpan and Detroit, U.S.A.)
An association of actin isoforms with the expression of motile response in pigmentation variants induced from goldfish erythrophoroma cells 271
